SUMMARY

Frontend Engineer with production experience building enterprise web applications in React and TypeScript for German clients. Proven track record in delivering real-time scheduling workflows (Pusher), robust RBAC interfaces, and automated testing architectures (4,900+ Bun unit tests at 80%+ coverage floor, 70+ Playwright E2E suites). Focused on maintainable UI architecture, CI/CD reliability, and high-impact business features. Awarded Best Graduation Project (2025).

EXPERIENCE

Frontend Engineer

AutoMate Solutions

ORBIT | Enterprise Sales & Field Operations Platform

Dec 2025 — Present

Ho Chi Minh City, Vietnam

React · TypeScript · Pusher · Playwright · Bun Test

- Client: Galvanek Bau GmbH (Germany)
- Delivered core enterprise modules (**Call Center V2**, **Multi-Calendar Scheduling**, **8-Stage Conversion Funnel**, and **Payroll/Commissions**) across 10+ operational feature streams, shipping 180+ tracked roadmap tasks.
 - Engineered real-time appointment synchronization and travel-time recalculation using **Pusher**, implementing custom promise wrappers and timeout guards to eliminate websocket race conditions and UI deadlocks during concurrent bookings.
 - Built calendar booking guardrails (distant-week navigation warnings, setter blocker rules, and conflict-detection gates), preventing double-booking incidents and cutting manual scheduling errors.
 - Maintained a high-performance unit test suite of **4,900+ tests across 630+ files** with the **Bun** runner, holding instrumented whole-tree line coverage at **80.5%** (86.2% function coverage) and tracking regressions through a CI coverage ratchet.
 - Authored **78 Playwright E2E test suites** covering complex multi-user booking, reschedule, and payroll approval flows, optimized GitLab CI test runners with memory-aware worker scaling to prevent container cgroup OOMs and eliminate job timeouts.
 - Hardened application security and stability by sanitizing rich-text emails (**DOMPurify**), masking sensitive tokens from customer URLs, and resolving critical dev-proxy network leaks.

ATLAS | Enterprise Construction Management Platform

React · TypeScript · RBAC · E2E Testing

- Client: Galvanek Bau GmbH (Germany)
- Delivered project, vendor, construction-site, and report management modules with **React** and **TypeScript** for German field engineering operations.
 - Architected a comprehensive **RBAC matrix** across 5 distinct user roles (Admin, Project Lead, Site Supervisor, Vendor, Auditor), securing 100% of restricted routes, views, and contextual actions.
 - Built real-time document workflows and digital construction logs (**Bautagebuch**) enabling seamless, synchronous collaboration between headquarter coordinators and on-site field staff.
 - Implemented role-based **Playwright E2E test suites** to validate permission boundaries and prevent unauthorized privilege escalation or route bypasses.
 - Collaborated in English within cross-functional **Agile** sprints, addressed production UI/UX regressions and maintained code quality through peer reviews.

PROJECTS

Halora Cosmetics: Web Platform | Full-Stack Developer

React · Redux · Firebase · Cloudinary · Vercel

Jul 2025 – Dec 2025

[Live: halora-cosmetic.vercel.app](https://live:halora-cosmetic.vercel.app)

- Awarded **Best Graduation Project** (highest thesis defense score) at Thu Dau Mot University.
- Built a full-featured e-commerce platform with customer storefront and admin dashboard, backed by **Firebase** Auth and Realtime Database.
- Managed cart, checkout, and inventory states with **Redux**, guaranteeing client-server consistency during concurrent stock updates.
- Integrated **Cloudinary** CDN for automatic format conversion (WebP/AVIF) and dynamic image transformations, reducing media payload sizes by over 40% and accelerating page loads.

Halora Cosmetics: Mobile App | Mobile Developer

React Native · Expo · TypeScript · Redux Toolkit · Firebase · Stripe

Jul 2025 – Dec 2025

[GitHub: Vileyy/user-halora-app](https://github.com/Vileyy/user-halora-app) · [Demo video](#)

- Co-awarded **Best Graduation Project** alongside the web platform.
- Developed a cross-platform (iOS/Android) mobile shopping application with **React Native**, **Expo**, and **TypeScript**, featuring variant selection, order tracking, and multi-criteria reviews.
- Structured code into presentation, business-logic, and data layers; implemented **Redux Toolkit** and **Redux Persist** to maintain user cart and auth sessions across app restarts.
- Integrated **Stripe** payment gateway supporting international card payments alongside Cash on Delivery, vouchers, and multi-address checkout flows.

- Implemented AI-driven capabilities via **OpenRouter API**: an interactive beauty-consultant chatbot, image-based product recognition, and personalized product recommendations.

SKILLS

- **Languages**: TypeScript, JavaScript, HTML5/CSS3.
- **Frontend & Mobile**: React 19, React Native, Expo, Redux Toolkit, Redux Persist, Tailwind CSS, Shadcn/UI, Radix UI, React Hook Form, Zod.
- **Testing & CI/CD**: Playwright (E2E), Bun test (unit), Happy-DOM, Code Coverage Ratchet Gates (80%+ threshold), GitLab CI, UI Regression Testing.
- **Architecture & Tools**: RESTful APIs, WebSockets & Pusher, RBAC Matrix, Firebase (Auth, Realtime DB), Stripe, Cloudinary, OpenRouter API, Git, Vercel, EAS Build, Agile/Scrum.

EDUCATION

Thu Dau Mot University

2021 — 2025

Bachelor of Computer Science, Software Development

Ho Chi Minh City, Vietnam

- Relevant Coursework: Software Testing, Software Architecture, Software Deployment, Cloud Computing, Concurrent Programming.

ACHIEVEMENTS

- **Best Graduation Project**: both Halora Cosmetics projects (web and mobile) were selected as the most outstanding projects in the graduation thesis defense, Thu Dau Mot University, 2025.
